JUNE 2018

The futuristic, eco-friendly electrical trike
that is economical and fun to ride. —

trinethra

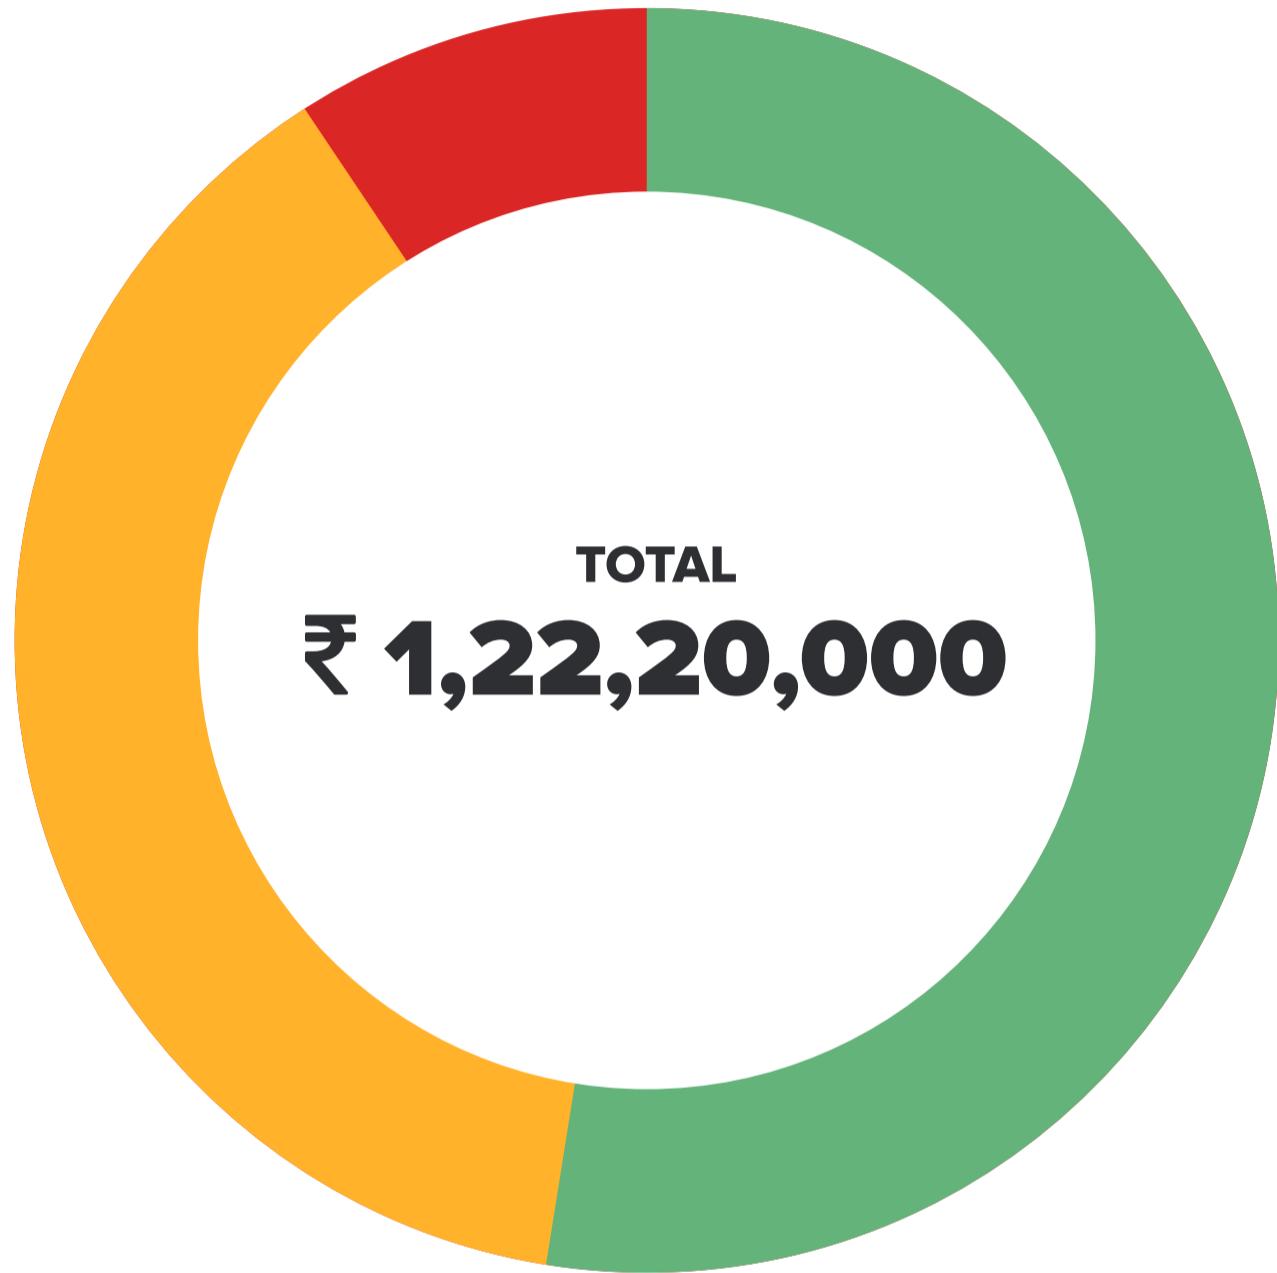

*Representation of trike chassis

Advantages

- › Pioneer of Trikes in India
- › Comfortable, eco friendly long drives
- › Holistic 360 degree coverage using state-of-the art camera coverage technique
- › Comfort of a car at the feel of a bike.
- › Forward collision control, ensuring 99% accident prevention

Funds required for next 1 year

- > **Hardware**
₹ 64,00,000
- > **HR**
₹ 54,00,000
- > **Operations**
₹ 4,20,000

Expected outcome at the end of 1 year

Ready - to - market trike with utmost efficiency at the best cost with all required legal approvals, in compliance with the Indian automobile regulations.

Market share

The total number of automobiles produced per year in India is **26 Million**.

With increased focus on energy utilization & increased interest in luxury domestic three wheeler segment, considering a capture of **0.5%** of market share for trikes, there would be a need to produce **13,000** trikes per year.

At a market price of **Rs.10 Lakhs per trike, Rs.1300 Crores** will be the revenue generated per year.

With the net profit @ **40% , Rs.420 crores per annum** can be the expected profits.

A professional portrait of a man named Gopiraja. He is a bald man with a dark beard and mustache, wearing a dark blue suit jacket over a white button-down shirt. A red patterned pocket square is visible in his jacket's breast pocket. He is standing in front of a white door with glass panels, which reflects the interior of a room with yellow walls and furniture.
